## Weekly Classes

Homemade Hope provides hands-on sessions at homeless shelters where children experience the joy of family meals, the nurturing power of creative collaboration in making special dishes, opening young minds and spirits to visions of a good life ahead.

1

The children use fresh ingredients to create dishes like spinach quiche, fresh pasta, and taco salad

2

The children learn about nutrition and healthy eating through activities and recipes utilizing fresh fruits and veggies.

3

The children gather around the table to share the meal they have prepared with their peers and families.

## Holiday Parties

1

The children experience the joys of holiday celebrations, developing traditions and creating life-long memories.

2

The children invite their families to share in the magic of the holidays at our celebrations.

3

The children create holiday decorations and centerpieces using photographs, flowers, and artwork.

The children watch with excitement as fresh strawberries are being sliced; they savor the aroma of spinach quiche baking in the oven, they feel and knead dough to make fresh pasta, and taste the flavors of roasted turkey and baked yams at Thanksgiving. These experiences transform their shelter into a home.

1

Field trips broaden the children's horizons; they learn about diverse cultures and cuisines from local chefs.

2

The children visit museums where they take part in interactive lessons and learn about health, art, and science.

3

The children visit farmers markets, discovering fresh produce and local ingredients.

## Fieldtrips
